PROJECTS

Personal Portfolio Website (Link) : A website that showcases my skills, projects and experiences with a responsive design & modern carousel .Build using HTML,CSS, JavaScript, Swiper.js and jQuery.

Weather application (Link) : This weather app provides real-time weather information based on user input. Built using HTML, CSS, and JavaScript, the app allows users to enter a city name and view current weather conditions, including temperature, humidity, and wind speed. It dynamically updates the weather data and displays it in a user-friendly format**.**

Guesser Game (Link) : Created a simple console-based guessing game in Java, utilizing Object-Oriented Programming (OOP) principles. The project focuses on basic concepts like classes, methods, and user input handling, designed to run in a code editor for interactive gameplay.

Landing pages:

(Link) : A static website designed to showcase Spotify interface layout. Developed using HTML and CSS.

(Link) A grocery site page which is static, developed using HTML & Tailwind CSS.

(Link) This website is static and simple interface6, developed using HTML and CSS.
